

HANGING TEMPLATE - Living Room Gallery

Wall size: 500 mm wide × 500 mm tall

>>> **STEP 1: VERIFY PRINT SCALE BEFORE DOING ANYTHING ELSE <<<**

<-- 100 mm -->

(scale check — not your wall size)

MEASURE THIS SQUARE

Both sides must be exactly 100 mm.

If either side is wrong: REPRINT.

See printer settings below.

<-- 100 mm -->

How to print at 100% / Actual Size:

Adobe Acrobat / Reader:

File > Print > Page Sizing: 'Actual Size'

NOT 'Fit' or 'Shrink to printable area'

Chrome / Edge browser:

Print > More settings > Scale: 100%

Uncheck 'Fit to page'

macOS Preview:

File > Print > Scale: 100%

Uncheck 'Scale to fit'

Windows Print dialog:

Printer Properties > Paper/Quality >

'Actual size' or 'None' scaling

ASSEMBLY & DRILLING INSTRUCTIONS

- STEP 2 - Tile alignment:** Cut along the crop marks (small grey lines at page corners). Overlap neighbouring tiles so the crop marks align. Tape from behind with low-tack masking tape.
- STEP 3 - Position on wall:** Use a spirit level. Align the top edge of the template to your chosen height. Mark the wall edges in pencil so you can reposition if the tape slips.
- STEP 4 - Drill:** Drill through the paper at each red X. Use a 4-6 mm bit for D-ring anchors. Hold the template flat against the wall while drilling - do not let it shift.
- STEP 5 - Remove:** Peel the template away. Erase pencil lines. Hang your panels.
